Subject: WL update 1/13

Mike,

Here's what I've been working on with West Lake this week:

- Helped develop language on preliminary results from Bridgeton Dust screening results.
- Provided input for vegetation sampling as part of the update to the Non-Combustible Cover (NCC) sampling plan.
- Provided a rewrite of a public inquiry email question regarding relocation and when EPA's reactor accident guidance is applicable.
- Updated my comments to the RI as the team prepares a comment letter.
- Began reviewing the risk assessment.
